

Darco Tank to Pipeline Double Sphere Expansion Joint or Flex Member

Rubber flex members incorporate standard flat faced galvanized steel backed rubber flanges and are stocked in 4" through 12" standard pipe sizes.

IMPORTANT

Wrap assembled flex member with poly sheet (provided by installer).

IMPORTANT

Keep protruding studs or bolts away from the tank and rubber body of the expansion joint.

NOTES:

- NSF Approved for drinking water.
- No additional gaskets are required.
- Not UL/FM listed for fire service but well suited for that application.
